FIG. 5A

Figure 1 consists of 12 histograms arranged horizontally, each representing a different value of n from 10 to 120. The x-axis for all histograms is 'Number of non-zero elements' ranging from 0 to 120. The y-axis is 'Frequency' ranging from 0 to 100. The histograms show that as n increases, the distribution of non-zero elements shifts to the right, with the peak frequency decreasing and the spread increasing.
